

Johnathan Falbo

Kansas City, MO

Professional Summary

Reliable and motivated professional with hands-on experience in warehouse operations, logistics, equipment handling, and skilled trades, now expanding into modern web development. Known for strong work ethic, accountability, and consistency. Currently building proficiency across a full-stack JavaScript-based tech stack while maintaining steady employment and delivering results in fast-paced environments.

Experience

Forklift Operator — Mygrant Glass, Kansas City, MO

March 2025 – Present

- Operate forklifts and material-handling equipment to stock, stage, and load glass products safely and efficiently
- Support daily deliveries and assist across multiple roles to keep operations moving without bottlenecks
- Maintain inventory flow and organization, reducing backlogs and improving turnaround time
- Recognized for reliability, strong work ethic, and stepping in wherever needed to keep the team on pace

Additional Experience

Warehouse, Logistics, and Skilled Trades Roles — Kansas City Metro Area

- Forklift Operator / Warehouse Worker (UPS Freight, FedEx, Rensenhouse Electric)
- Driver / Mover (Moovers)
- Power Washing & Detailing (Perry Power Washing)
- Electrical Maintenance & Facilities Support (Commercial & Industrial Settings)

Projects

Personal Portfolio Website

- Designed and built a responsive portfolio using HTML, CSS, JavaScript, React, and Tailwind CSS
- Deployed live projects and updates using modern frontend workflows
- Demonstrates component-based UI design, state fundamentals, and clean layout practices

Web Development Coursework Projects

- Built multiple frontend applications focused on real-world layouts, user interaction, and responsive design
- Practiced translating requirements into working features using modern JavaScript and React

Technical Skills

Frontend: HTML5, CSS3, JavaScript, React, Tailwind CSS

Tooling: VS Code, Git/GitHub, Vercel

Core Concepts: Component-based UI, state management fundamentals, responsive design, semantic HTML

Interests & Direction

Focused on transitioning into technology and AI-assisted software development, with a strong interest in building practical tools and applications that simplify complex or difficult tasks and improve everyday workflows.
